MAXIMUM EFFICIENCY

The most advanced intelligent monitoring technology with high level of professionalism of Danta-Invest provides safe returns on your investments ensuring maximum

Danta investment company was established on August 15th, 2016, with the intention of providing a guaranteed return on any investments made in the business. Returns on investments are guaranteed on the investing platform Dantainvest as soon as five (5) days following the investment's maturity term.

With 25 years of expertise in the building industry, forex trading, medical equipment, cryptocurrency investment, agriculture and oil trading.

We are of the biggest institutional owners of cryptocurrencies and other investment platforms, Dantainvest is the top blockchain investment company. In 2012, a group of experienced exchange market traders launched Danta invest. After extensive deliberation and research into the brokerage service market, it was decided to establish a business that might meet the unmet need for trust asset management. One of the main goals while working on the lucrative but risky crypto market is to help clients who have trusted us with managing their assets to reduce

The Danta invest team has experience in both traditional banking and emerging blockchain technology, and we are particularly interested in investing in both technologies as well as other important assets.

Danta Investment Company is carrying out its strategic investment philosophy by building a diversified portfolio and providing industry-specific value-add resources to its portfolio companies. The company has strong relationships with some of the most promising entrepreneurs and other leading investors in the area.

We see blockchains and digital currencies playing a significant, well-managed, and regulated role in the world economy over the coming few years.

REAL ESTATE INVESTMENT

Buying real estate is about more than just finding a place to call home. Investing in real estate has become increasingly popular over the last 50 years and has become a common investment vehicle.

Although the real estate market has plenty of opportunities for making big gains, buying and owning real estate is a lot more complicated than investing in stocks and

**AGRICULTURAL INVESTMENT**

Global population growth, a changing climate, and rising household incomes in emerging markets are putting pressure on the world's most critical resource – food.

For more than 10 years we've combined farming expertise, investment management discipline and a deep understanding of global commodities markets 'in-house', to become one of UK's largest diversified farmers and a major investor in Brazilian agriculture.

INVESTMENT CONSULTANCY

We do in-depth work on formulating clients' investment strategies, helping them fulfill their investment dreams.

Danta Invest provides investors with investment products, advice and/or planning, do in-depth work on formulating investment strategies, helping you fulfill your needs and reach your financial goals. We also provide strategic advice on asset allocation, risk management, investment policy development, asset class structuring, investment manager evaluation and monitoring.

CRYPTOCURRENCY INVESTMENT

Virtual or crypto currencies like Bitcoin and Ethereum are definitely by far the hottest investment.

Cryptocurrency is a form of digital money that is designed to be secure and, in many cases, anonymous. It is a currency associated with the internet that uses cryptography, the process of converting legible information into an almost uncrackable code, to track purchases and transfers.

FOREX TRADING

The Forex market also referred to as the "Currency market", it is the largest and most liquid market in the world.

The foreign exchange market (Forex) is the "place" where currencies are traded. Currencies are important to most people around the world, whether they realize it or not, because currencies need to be exchanged in order to conduct foreign trade and business. If you are living in the U.S. and want to buy cheese from France, either you or the company that you buy the cheese from has to pay the French for the cheese in euros (EUR).

STOCK & COMMODITIES

Stock & Commodities can actually reduce overall risk as a part of a diversified portfolio.

Investing in stocks can be very costly if you trade constantly, especially with a minimum amount of money available to invest. Stock investing & Commodity investing do not always deliver the same return, there are times when one investment outperforms the other; maintaining an allocation to each group may help contribute to a portfolio's overall long-term performance.
